Organizations are now so dependent on the automation of large parts of their business processes that the quality of IT services and the synchronization of these services with the needs of the organization are now essential to their survival. This introduction to IT Service Management, published by TSO, is based on a previous product that was published by Van Haren Publishing on behalf of itSMF Netherlands. This latest edition is intended to serve as a thorough and convenient introduction to the field of IT Service Management and the books in the IT Infrastructure Library (ITIL). This new edition contains additional chapters on recently published ITIL books: ICT Infrastructure Management, Application Management, Planning to Implement Service Management and The Business Perspective. We expect that this book will fulfil a clear need, and it deserves not just to be read and studied, but also to be used...
