BiblioGov. Paperback. Book Condition: New. This item is printed on demand. Paperback. 34 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. Pursuant to a congressional request, GAO reviewed problems the Navy encountered in maintaining its electronic warfare systems. GAO found that: (1) the Navys test equipment inadequately verified that electronic warfare systems functioned properly while installed in aircraft; (2) since much of the Navys electronic warfare test equipment was inoperable, lacked reliability, and had numerous defects, Navy technicians did not consistently use the equipment; (3) some test equipment needed to maintain electronic warfare systems on two aircraft lacked the necessary components and software for operation, and as a result, Navy maintenance personnel could not effectively verify electronic warfare system readiness before deploying those aircraft; (4) test equipment the Navy used in its repair stations aboard aircraft carriers and at Naval air stations had repeated failures, was sometimes inoperable for extensive periods, and lacked the ability to detect problems quickly; (5) contrary to Department of Defense (DOD) and Navy policies requiring the development of test equipment and support for electronic warfare systems prior to their deployment, the Navy permitted test equipment development to lag behind systems development, and failed to evaluate the adequacy of test equipment during system operational testing; and (6) test equipment for the Navys new Airborne Self-Protection Jammer could be inadequate, unless it strengthens controls over its acquisition process. This item ships from La Vergne, TN. Paperback.
