Esteemed medical university professor of surgery Dr. Gilbert Bradham has found that metabolic research and treatment have provided a unique method for weight loss and proven successful for thousands of patients from all walks of life. Where today's diets fail, Dr. Bradham's unique combination of appetite suppressants, meal replacements, and ready access to expertise helps patients lose weight easily and maintain good health for life. What Dr. Bradham has shared with a generation of patients, and now reveals in this book, is that the building blocks to health are simple. Carbs, fat, and protein all play a part in maintaining a healthy body. But too much or too little of any component can result in not just obesity but a slew of diseases and health problems. The key is introducing the right combination of foods to keep a body energized and healthy without storing anything extra as fat. This scientifically proven combination, if set and monitored by a physician, is a nearly infallible key to weight loss. It's worked for thousands of thankful patients.
