

Extending a process-centred SEE by context-specific knowledge delivery

By Arne Könnicker

GRIN Verlag Apr 2008, 2008. Taschenbuch. Book Condition: Neu. 210x148x8 mm. This item is printed on demand - Print on Demand Neuware - Diploma Thesis from the year 2000 in the subject Computer Science - Software, grade: sehr gut, University of Kaiserslautern (Department of Computer Science - Artificial Intelligence / Knowledge Based Systems Group), 30 entries in the bibliography, language: English, abstract: Process-centred software engineering environments (PSEE) [Garg96] are acknowledged tools to help in planning, managing and executing today's software projects. Their support is mainly focused on the coordination of the different activities within a project following a defined development process, i.e. focused on project coordination. That is why the support for the individual participating agent in performing tasks (which have been assigned to him) is mainly restricted to provide access to input products for a task and to tools to create defined output products. Main tasks for a software project are the creation of a project plan and the enactment of this project plan in order to deliver certain software products. Planning and enactment tasks require access to multiple information related to the current project context. If no direct access can be supported, e.g., in the form of...
